

	AWS Service	Description	Projects
Significant VMware Experience	EC2	Spin up virtual servers	23
	Lightsail	Quickly deploy applications and web sites	5
	S3	Cloud storage	20
	Cloudfront	Minimizes latency globally	10
	Route 53	DNS	13
	AWS VPN	VPN	8
	RDS	Managed database services	15
	Auto Scaling/Load	Automatically scale up or down as demand changes	16
	Redis	Real-time database (Amazon ElasticCache)	4
	VPC	Private Networks	18
	Directory Service	Domain Directory Service	3
	WAF and Shield	Application Firewall	7
	SES	Email Service	10
	SNS	Notification Service	5
	EFS	File System	1
		AWS Cost Explorer	25
		Reserved Instance Reporting	6
		AWS Budget	20
	ELB	Elastic Load Balancing	18
	IAM	User access & encryption key management	20
	Certificate Manager	Provision, Manage & Deploy SSL/TLS certificates	9
	Glacier	Low-cost archive storage	3
	Backup	snapshots, centralized storage	20
	Management Console	Web-based user interface to manage AWS stack	20
	CloudTrail	AWS account logs	16
	CloudWatch	AWS monitoring and alerting	19
	AWS Elastic Search	for wordpress and logs searching	2
	AWS API Gateway	used with Lambda as API endpoint	1
AWS User VPN	AWS user VPN Site to Multi User	1	
AWS Backup	to create backup plans	5	
Limited Experience	Elastic Beanstalk	Run & manage web applications	2
	ECS	Container services	1
	AWS Kinesis	Used for WAF logs management	2
	EKS	Kubernetes	1
	Redshift	Database	1
	IOT	Internet of Things	1
	Mechanical Turk	Human intelligence tasks	
	SQS	Queueing Service	1
	Lambda	Serverless function call	1
	DynamoDB	Managed NoSQL database	1
	DocumentDB	Managed document db (MongoDB)	1
	CodeCommit	Private Git Repository	1
	CodePipeline	Continuous delivery	1
	CodeBuild	Build & test code	1
	CodeStar	Develop & deploy apps	1
	WorkSpace	Virtual desktop	3
	CloudFormation	Create / manage resources with template	1
	AWS Glue	used to get data from 1 db and put into	1
	Cognito	Create user accounts for sign in	3
